Shahariyas

Tirur, Kerala shahariyaschatheri10@gmail.com +91 9061451636 LinkedIn GitHub

Summary

Professional Python Full Stack Developer with advanced backend expertise in Django REST Framework and frontend proficiency in React JS. Specializes in designing scalable and secure REST APIs, managing database migrations, and implementing robust JWT authentication systems. Adept at developing efficient CRUD operations and delivering innovative technical solutions.
Also experienced in React Native, Flutter, and PHP Laravel, with a strong focus on cross-platform mobile development and high-performance web applications.

Technical Skills

Core Languages: Python, JavaScript, SQL, PHP, Dart, HTML, CSS

Frontend Development: React.js, Next.js, Responsive UI, Tailwind CSS, REST API Integration

Backend Development: Django, Node.js, Laravel, RESTful API Design, Authentication & Authorization

Mobile Development: Flutter (Android & iOS)

Databases: MySQL, PostgreSQL, SQLite, Neon DB

Cloud & DevOps: Render, Vercel, Netlify, AWS S3, Cloudinary, Docker (Basics), CI/CD (GitHub Actions)

Automation & RPA: UiPath, Automation Anywhere, n8n, Workflow Automation, API Orchestration

Tools & Engineering Practices: Git, GitHub, Postman, VS Code, PyCharm, Debugging, Performance Optimization

Platforms: Web, Android, iOS

AI & Machine Learning: AI Chatbot Development, NLP Basics, Model Integration, AI-powered Automation

Experience

Lead Automation Developer *Kochi, Kerala*
Intellijhon *Sep 2025 – Present*

- Engineered end-to-end bot flows for high-volume business processes, including exception handling, dynamic queue management, and error recovery.
- Developed custom automation scripts in Python/JavaScript for API integration, web scraping, and data transformation to extend RPA platform capabilities.
- Designed and implemented API-driven workflows, connecting RPA bots with REST/GraphQL services and legacy systems to enable seamless data exchange.

Python Full Stack Developer *Kochi, Kerala*
Luminar Techno Lab *Sep 2024 – Present*

- Built secure, scalable, and modular back-end architectures using Python and Django.
- Designed and developed RESTful API endpoints to ensure efficient data exchange and integration with front-end systems.
- Implemented database models and logic using MySQL and SQLite, focusing on data integrity, query optimization, and smooth migrations.
- Implemented JWT-based authentication and role-based access control to ensure secure and flexible user management.
- Developed responsive and interactive front-end interfaces using React, enhancing cross-device user experience.

Education

APJ Abdul Kalam Technological University, Trivandrum *june 2020 – May 2024*
B.Tech in computer science and engineering

- GPA: 6.7/10
- **Coursework:** System Software, Algorithm Analysis and Design, Database Management System, Machine Learning, Deep Learning.

MSM HSS, Kallingparamba *june 2018 – May 2020*
Higher Secondary Education

Projects

E-Commerce Web Application *Link*

- Developed a full-featured e-commerce platform with user authentication, product catalog, shopping cart, and secure admin panel.
- Designed clean and responsive UI integrated with Django's templating engine and backend logic.
- Implemented secure payment workflow and role-based access using Django's built-in auth system.
- Optimized database interactions using Django ORM and handled migrations efficiently.
- **Tools Used:** Django, Python, SQLite, Razorpay, HTML, CSS

Disaster Alert & Management System (DAMS) *Link*

- Developed a real-time mobile application using Flutter for users to send emergency alerts during disasters.
- Built a web-based control panel for disaster management authorities to monitor and respond to incoming alerts.
- Integrated Google Maps API for geolocation tracking and visual representation of reported emergencies.
- **Tools Used:** Flutter, Firebase, Google Maps API
